

Sunvalley Systems

Experts in all Your Energy and
Construction Needs

COMPANY PROFILE

WHO WE ARE

- We are a compact provider of energy and construction-related services and products, made up of a vibrant team of experts that takes up all your needs in the sector and provide a solution that leaves you a happy & satisfied client.
- Our core business is to seek and provide a sustainable solution to our clients in the lines of energy and construction.

WHAT WE DO

- **Energy**

We are specialists in provision of products and services relating to energy.

We supply and offer installation services for variety of solar products, including Solar PV modules, controllers, batteries, power inverters and all accessories, for both off-grid and grid-connected systems. We also perform all other type of electrical works and installations for both residential and commercial establishments.

- **Construction**

In the construction sector we partake low-to-middle level building and construction contracts and assignments relating to civil and structural engineering.

OUR SERVICES

- Electrical installations and Maintenance
- Supply of Solar products and electricals
- Solar system design and implementation
- Electrical power audits
- Building and constructions
